Protect Your Heart

February's
Special

5% off Heartworm prevention!!

Heartworm disease is developed when your pet becomes infected with parasites called "Dirofilaria Immitis" that are transmitted through the bite of an infected mosquito... all it takes is ONE BITE! Heartworm disease often leads to severe lung disease and heart failure and can damage other organs in the body as well.

*Ask one of our staff members to
schedule your pets' heartworm screening today!*
